PRODUCT DESCRIPTION

- Formulated from Manildra's unique dried distillers' grains and syrups (DDG-S), cereal grains and starches.
- Designed to encourage rumen development in calves.
- Pellet size is 6mm.
- Free of any genetically modified organisms.

PRODUCT FEATURES & UNIQUE BENEFITS

Extremely palatable and contains:

- Vitamins and minerals for health and development – including Biotin, a vitamin to improve hoof health; and HyD, highly effective vitamin B source for significantly increased calcium and energy metabolism.
- Bovatec 20cc, an ionophore, to control coccidiosis caused by Eimeria species.

FEEDING RECOMMENDATIONS

- Introduce from four days of age, increasing amounts gradually (until weaning at consumption rate of 1kg of Calf Pellet daily for three consecutive days).
- Feed should be offered fresh daily in frequently cleaned troughs.
- Fresh, clean water must always be available.
- It is recommended that independent advice is considered when feeding supplements.

PROTEIN FIBRE & FAT FRACTIONS (DM)	
Protein	19.6%
RUP (%CP)	26%
Rum ME	12.8 MJ/kg
ADF	11%
NDF	24%
NFC	47%
Fat	4.5%
1 KG/HEAD/DAY	
MACRO MINERALS	
Calcium	13.9 g/head
Phosphorus	8 g/head

Lasalocid (bovatec)	50mg/head

STORAGE: Manildra Calf Pellets should be stored in a clean and dry environment, protected from weather and free of any rodent or insect infestation.

IMPORTANT CAUTION

Care must be exercised when feeding with other antimicrobials.

Do not allow dogs, horses or other equines to access feed containing ionophores as ingestion may be fatal.

Do not feed with any other ionophores.
