

POSITION VACANT ETHANOL OPERATOR

The Manildra Group is a major force in Australia's agricultural and food industries and is the largest user of wheat for industrial purposes in Australia. Manildra Energy operates the most advanced industry technology to process quality flour from our three flour mills and supply domestic and export markets with a range of gluten, starch, glucose, ethanol and stockfeed products to a variety of industries from food and confectionery to brewing and building.

Manildra Energy is seeking an individual to join our Ethanol team to learn the complex processes of Ethanol.

Duties: Operation of plant and equipment associated with ethanol operations; obtaining and testing samples during production; recording tests in accordance with documented procedures to meet specifications and undertaking various cleaning processes. Operation of ethanol plant processes. Once trained will act as a shift operator and or shift relief to cover shift operators.

The position involves at times shift work on a rotating roster and occasional overtime.

Essential:

- Forklift licence
- Class C Drivers licence
- This position demands a high level of communication
- Must possess effective literacy and numeracy skills with proven problem solving abilities.
- Knowledge of commitment to work health and safety along with HACCP, quality assurance and continuous improvement procedures are highly regarded.
- A trade qualification or previous experience working with Ethanol will be considered advantageous.
